**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2, 3, 4, 5, 19 and 20, drawn to a self extinguishing composite primary structure, classified in class 141, subclass 8.
- II. Claims 6-18, 21, drawn to a helicopter, classified in class 244, subclass 133.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require an epoxy structural film adhesive. The subcombination has separate utility such as material for constructing the hull of a submarine.

3. Claim 6 is an evidence claim, which indicates that the combination does not rely upon the specific details of the subcombination for its patentability. Where the combination (claim 6) does not set forth the details of the subcombination (Claims 2 and 3) and the subcombination (claims 2 and 3) has a separate utility (submarine hull

construction), the invention are distinct and restriction is proper. See MPEP 806.05(c)(III)

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

6. If applicant elects group II above, applicant is required under 35 U.S.C. 121 to elect a single disclosed species of components for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Currently, claims 6 and 21 are generic to these species.

- a. Wherein at least one component comprise an outer skin panel in a cockpit section of the helicopter (claim 7)
- b. Wherein said helicopter has a cabin section and said at least one component comprises an upper cabin door in said cabin section (Claim 8)
- c. Wherein said helicopter has a cabin section and said at least one component comprises a lower cabin door in said cabin section (Claim 9)

- d.      Wherein said helicopter has a cabin section and said at least one component comprises at least one floor panel in said cabin section (Claim 11)
- e.      Wherein said helicopter has a cabin section and said at least one components comprises at least one emergency egress hatch in said cabin section (Claim 12)
- f.      Wherein said helicopter has a transition section and said at least one component comprises an upper door in said transition section (Claim 13)

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. A telephone call was made to Barry Kelmachter on 8/4/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen A. Holzen whose telephone number is 571-272-6903. The examiner can normally be reached on M-F 8:30-5:00.
